TIMESCAPE

Intermediate Presentation

Daniel Bogenrieder, Jonathan Hale, Pau Ling Low

14.06.2018

Overview

1. Project Description
2. Concepts
3. Intermediate State + Outlook

Number One

Project Description

Technology: HTC Vive Pro
Single user setting

Imagine that you have to escape a physical escape room. Sounds challenging?
Now, imagine escaping a **virtual escape room**.

TimEscape is a VR entertainment game that allows players to immerse in a virtual escape room game, which means that anything and everything is possible.
Can the player successfully **escape?**

Project Desription

Goals of TimEscape

- Aim to catch players off guard, do what players least expected.
- Incorporate interactions that challenge player's perception and expectations of reality
- Explore different 3D interaction techniques
- Integrating Leap Motion's motion gesture control with HTC Vive Pro Headset

Number Two

Concepts

Concepts

Ideas & Sketches

Expectations

- Time
- Gravity
- Scale
- Solidity
- Consistency
- Location
- Direction
- Weight

Concepts

Aspects of Interaction

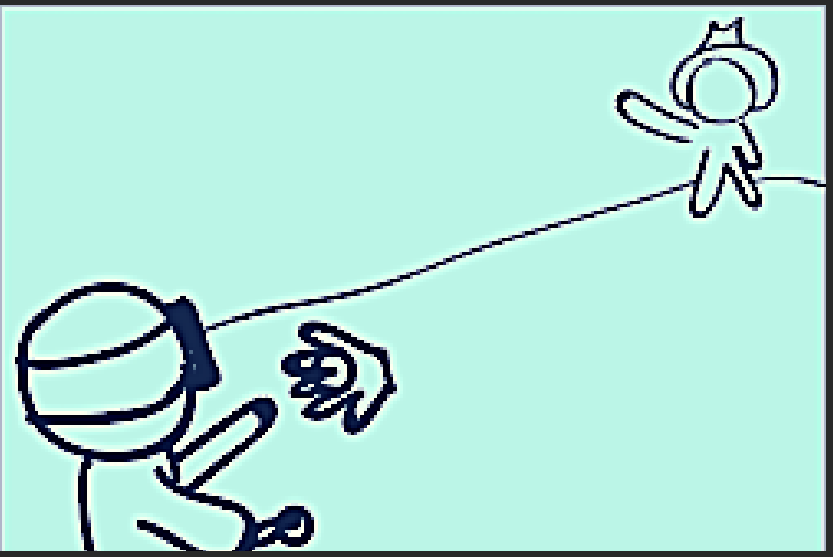
- **Navigation**
- **Manipulation**
- (Symbolic Input)

Active & Egocentric Interaction

- Motion tracking of player's physical movement and gaze
- First person perspective

Concepts

Interaction Techniques



- **Basic Task Manipulation**

  Egocentric Metaphors

  - GoGo Hand (Virtual Hand Metaphor)
  - Raycasting (Virtual Pointer Metaphor)

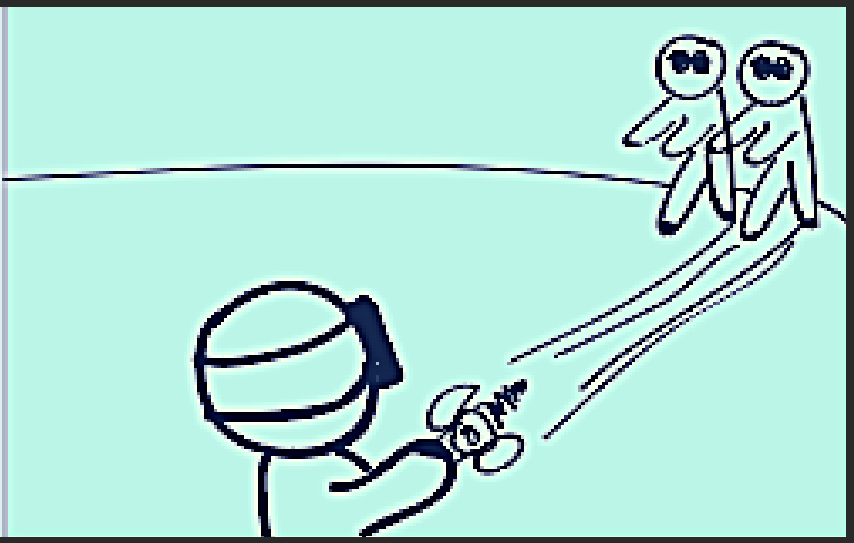
- **Navigation**

  Travel

  - Active & Physical Locomotion
  - Teleportation (to a predefined location)

Concepts

Interaction Techniques



- **Basic Task Manipulation**

  Egocentric Metaphors

  - GoGo Hand (Virtual Hand Metaphor)
  - Raycasting (Virtual Pointer Metaphor)

- **Navigation**

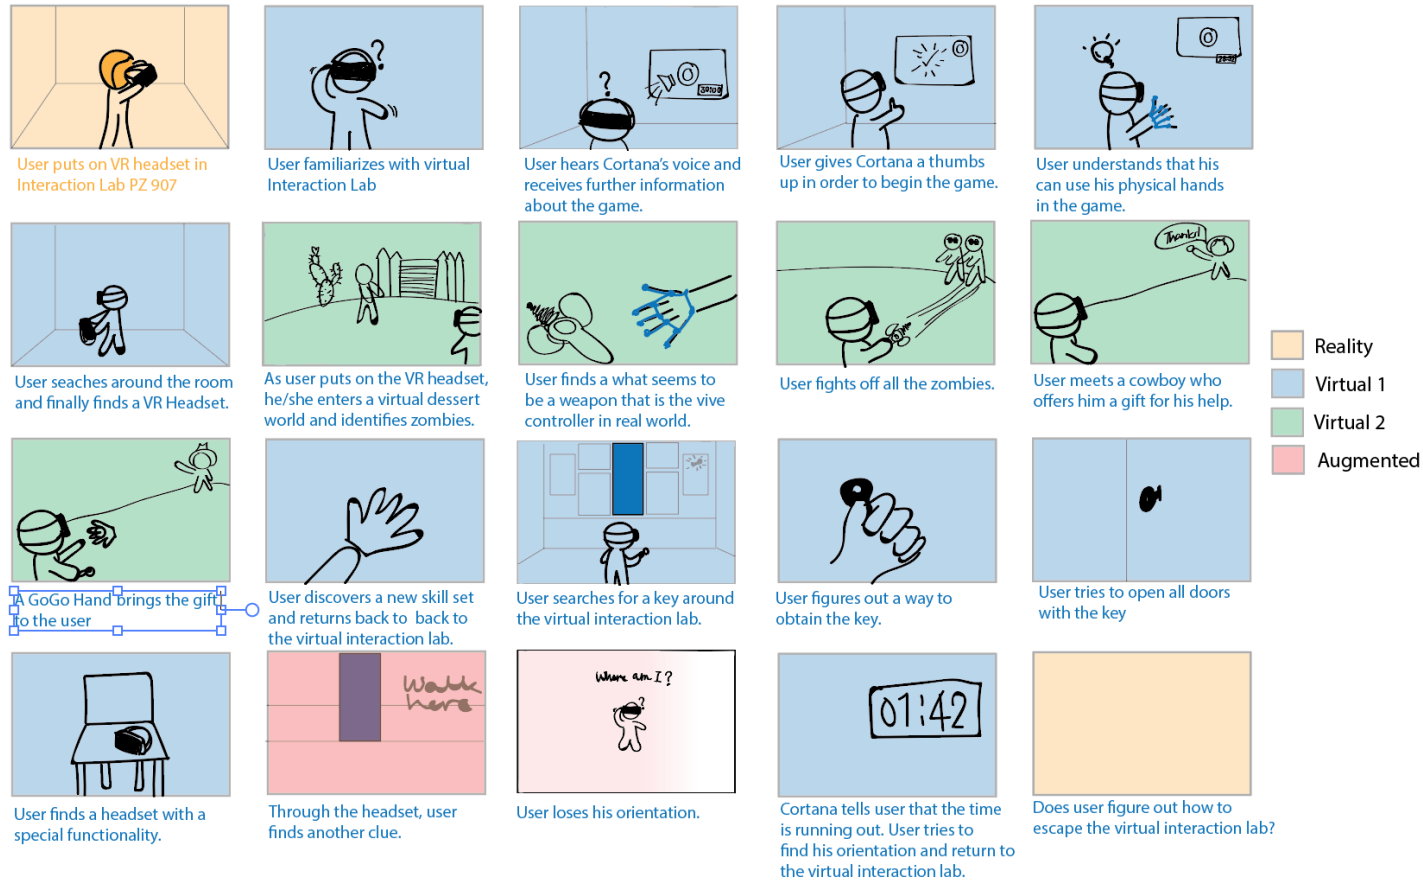
  Travel

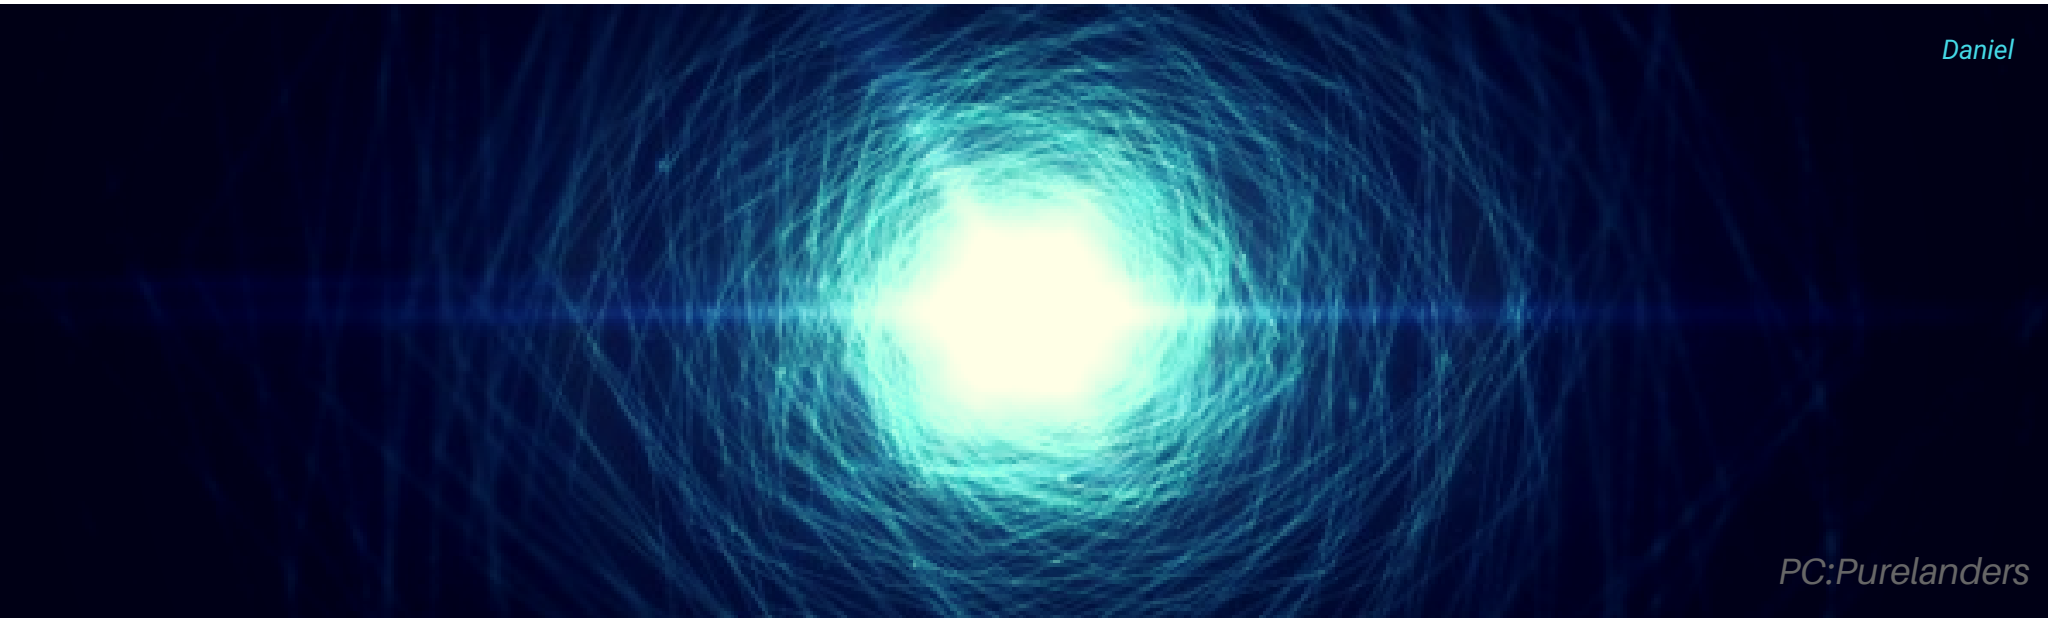
  - Active & Physical Locomotion
  - Teleportation (to a predefined location)

Concepts

Storyboard

- Linear Storyboard
- Different realities
- Time limit





Number Three

Intermediate State + Outlook

Intermediate State

Video

https://www.youtube.com/watch?v=mQKp2v6xTT4

Intermediate State

Room Scan

Project Tango

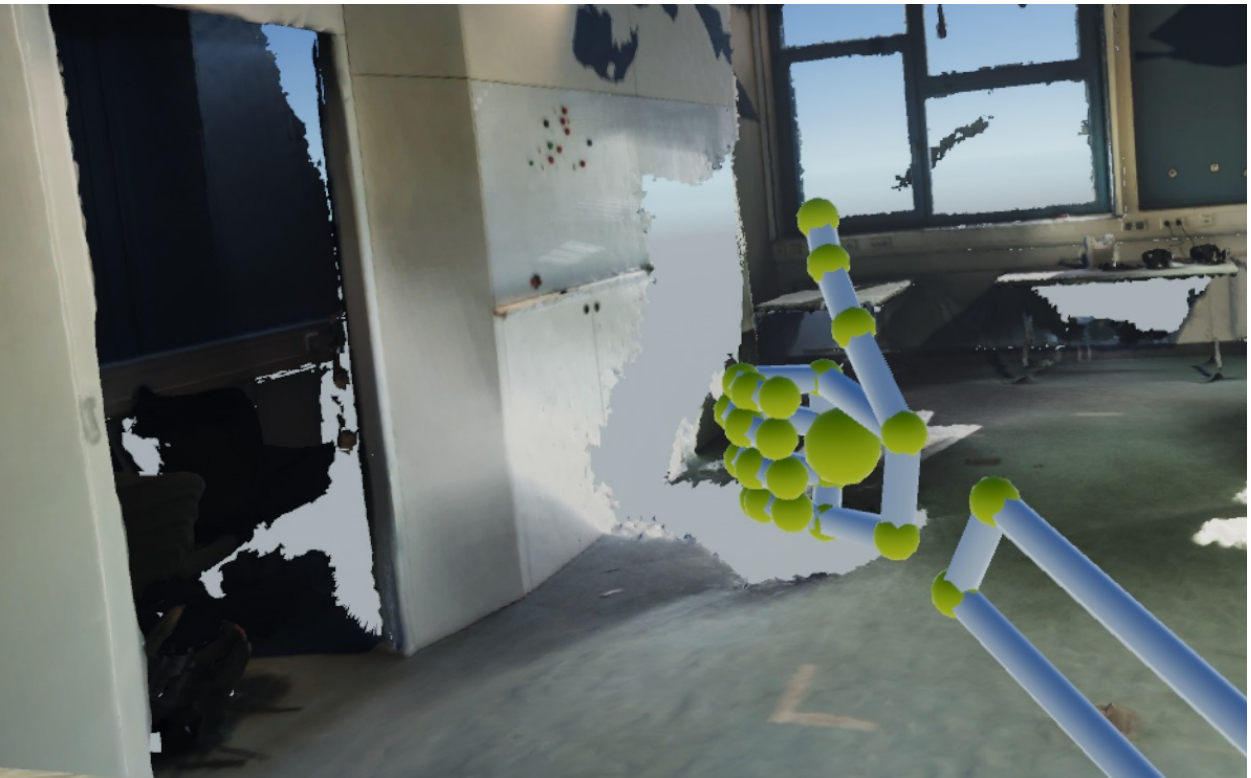
Intermediate State

Watson Integration

IBM Watson

Intermediate State

Leap Motion + Gesture Recognition



LEAP MOTION

Outlook

Further Steps

- Interaction techniques
- Puzzles & environments
- Improve room scan
- Redirected walking
- User testing

Outlook

User Test

Purpose

- Timing of game
- Difficulty of puzzles
- Understanding of interaction techniques

1-3 participants

Outlook

Timeline

- **June**

  Week 1: Intermediate Presentation (14.6)

  Week 4: Core Mechanics (28.6)

- **July**

  Week 1: User Test (5.7)

  Week 3: Final Prototype (19.7)

  Week 4: Record final demo (23.7)

  Final Presentation (27.7)

Thank you.
